Meeting with Product Owner

- Before the Pitch we should talk to the professor who is conducting the class for CMD
- we should check out the Maker's Lab and see if we can make a box (the drawings should be on github)
- PO will provide us with a github link
- we should rebuild the box and figure out how it works
- we should keep track of our experiences via documentation
- our experience rebuilding the box should be featured in the pitch
- CMD will definitely be involved
- Healthcare box will definitely involve some sensors
- register in our teams at VLO
- we should divide our attention
- we should make a sketch of how the components interact and explore

Meeting with Team Coach

- we have two aspects: technical and educational
- Norah is our coach
- We should be done by the end of june
- we should become a team: be present at all the classes
- we should talk about what we want to learn, why are we doing this project and find out how we can work together
- coaching will be every week
    - 2nd of march 14:30 (room will be told by email)
- manual on the vlo is really important (we should read and discuss it)
- find a way to manage our project, e.g. SCRUM
- Norah's email address will be provided by our dutch study mates
